### A Dry Season.

The report of the weather bureau of New Mex. for last month shows that the outlook for slockmen is not very bright The report says: A drought of unparalled severity now covers the whole Territory. At Santa Fe the total precipitation for the month was only a trace being the least precipitation ever record ed for the month of September, at that station, whose records cover a period of over twenty years. The late varieties of fruit were badly injured and in some localities nearly ruined by the drought. The cattle ranges are in very poor condition for the approaching winter and it appears that nothing but a very mild open winter can prevent heavy losses to

this important industry. The crops of small grains were harvested before being much affected by the drought, and about an average yield was secured. The corn crop is a little below While waiting for something from his friends with which to fill up this years the average, and potatoes are also below the average yield. From two to four orduce its size by a line or two, let us go the lest cutting of this excellent, for age. the last cutting of this excellent forage crop were bully up to the average, the As United States District Attorney helt cutting being badly affected by the istics of fruit were a little below the
